iPRO v12.1

Key information EA

Tab 1

➢ iPro trading method is very special, do not use Indicator. Because, it late than current prices, not be exactly as we traded short.

➢ iPro can make a profit of 0% - 20% on the day and also can lose 5% on the day. We can set the level of profits and risks based on trading volume.

➢ Time Trading: Fully automatic, no customization required. (It uses the MT4 hours).

➢ The pair traded: EUR/CHF, EUR/GBP, USD/CHF. Because the fluctuation range of the small pair in a day, we are short trade (scalping) of day trading and and make money in the sideways market very easy.

➢ EA can trade on: AUD/NZD, AUD/CAD, ... in the next version. Special customers are updated free of charge, if the customer has purchased the full version before.

➢ iPro has two modes to customize volume, 1 - fix lot, 2 - increased or decreased depending on the volatility of the current market.

➢ Stop Loss and Take Profit are all hidden, to avoid impact from Brokers. Reduce risks when market volatility is too strong.

➢ Parameters have been optimized, you do not need to adjust. But you can change if you like trading with other modes, it is really easy.

➢ Minimum deposit to secure for EA: all is good.

iPRO v12.1

Broker and Account

Tab 2

- iPro EA can work well with Brokers have No Dealing Desk: STP, ECN + STP. It is very important, please choose Brokers reputable, licensed, quick and easy withdrawal.

- iPro performs the best with True ECN accounts. **EX:** iCmarkets, Pepperstone, Tradeview, Vipro, Tickmill, Hotforex, Drawinex, XM, Exness, FXOpen, Tradersway, … and the same.

- Low/raw spread with commission. Recommend spread < 2.0 pips (20 points) and Commission < 10$/lot.

- Platform Metatrader 4 - MT4.

- 5 digits price.

- Minimum leverage: 1/50.

- Time zone: EA activities based on MT4 hours. So, you are in any other country, are not the problem.

- Server: Can be installed on VPS good 24/5 or install directly onto a computer but noted that the speed ping <= 250ms.
